

Step 4

How to Install the Root and Intermediate Certificates

1. Download Both LankaSign Root CA and LankaSign Intermediate CA Certificates from our Downloads section:

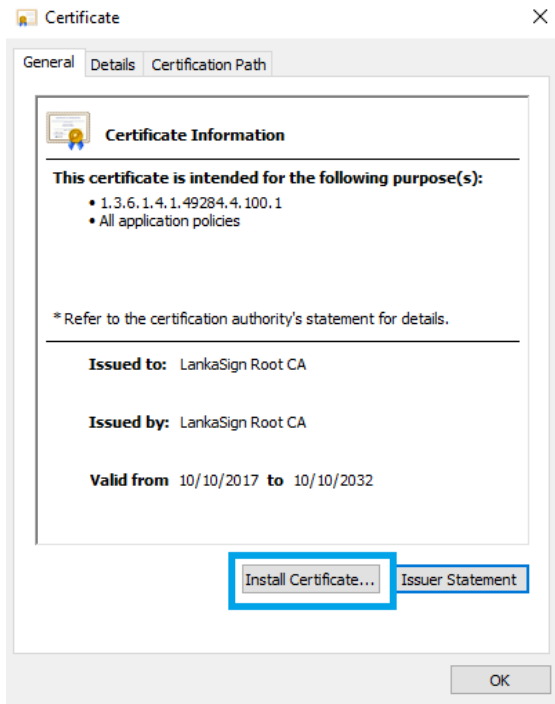

<https://www.lankaclear.com/knowledge-center/lankasign/#downloads>

2. Open Root and Intermediate Certificate

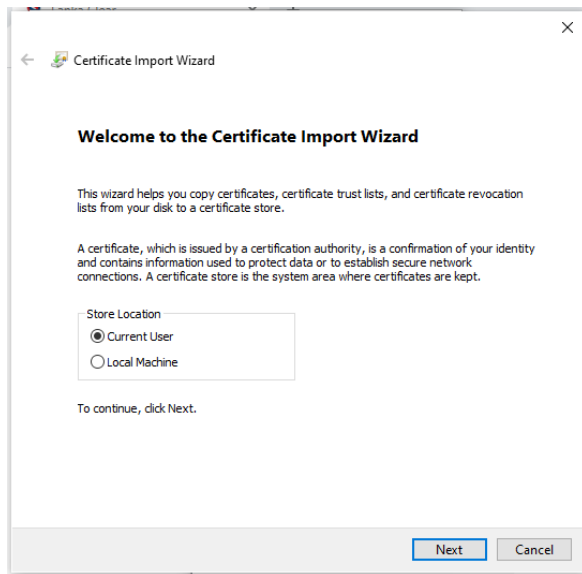

3. Install Root and Intermediate Certificate

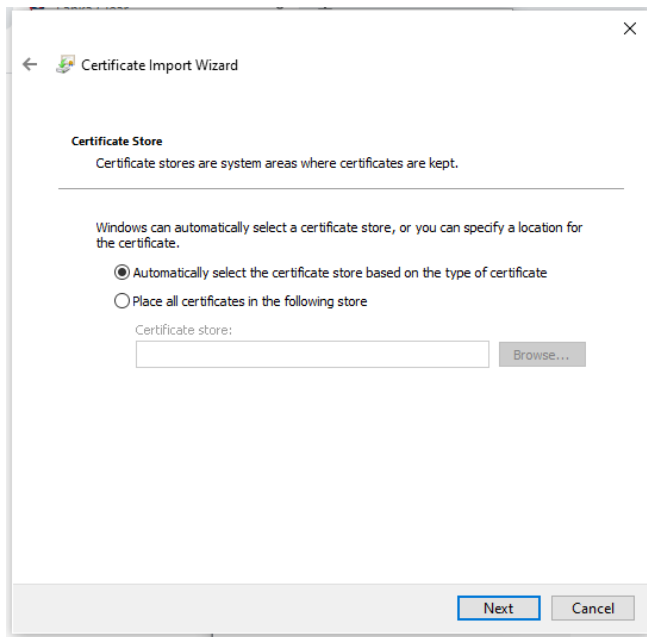

Double Click  Click Install Certificate

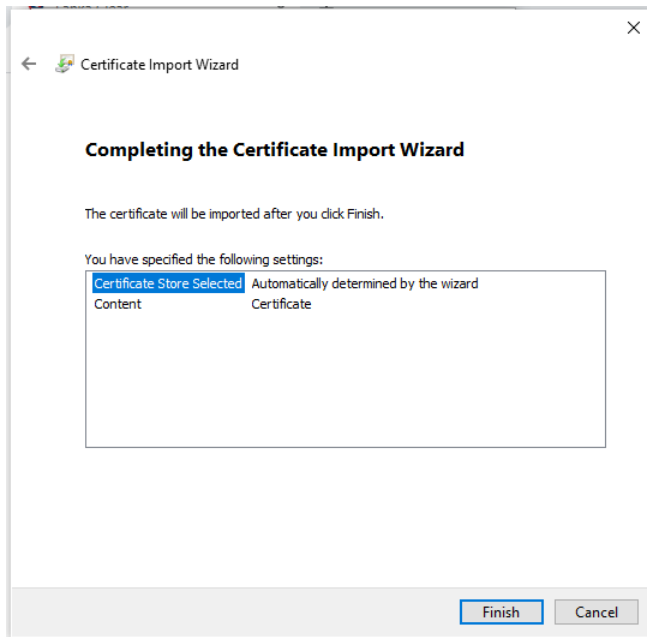

Click Next

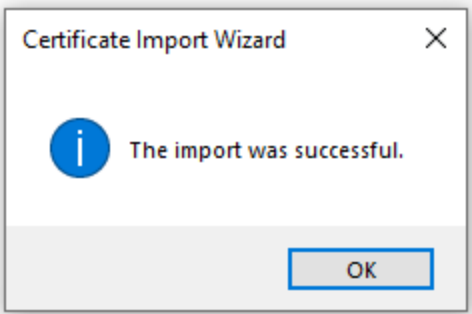

Click Next

Click Finish

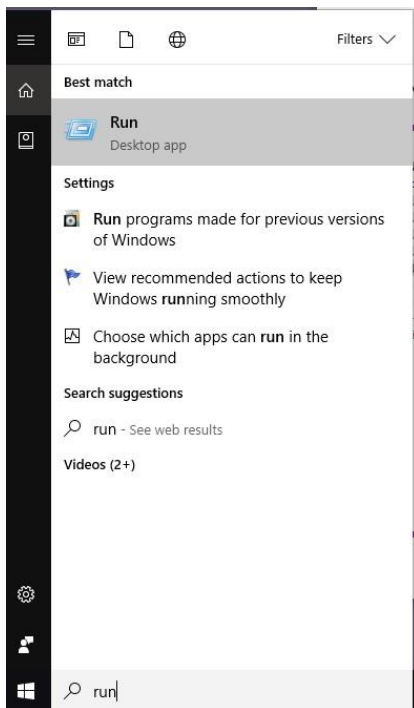

Click OK

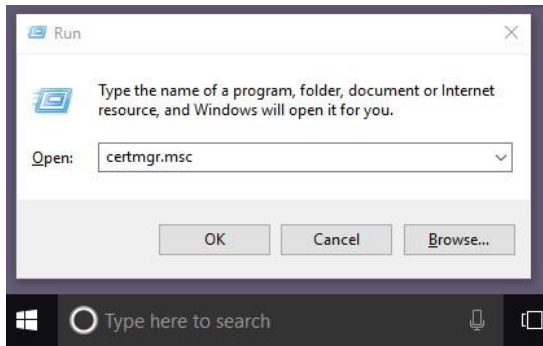

4. Check the installed certificate

Type in search bar > run

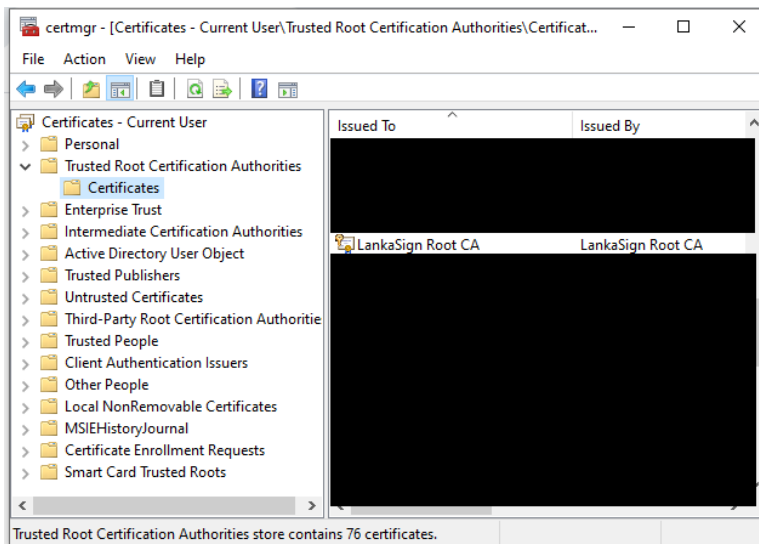

Get the run window.

Type on search bar > certmgr.msc , Click > **Ok**

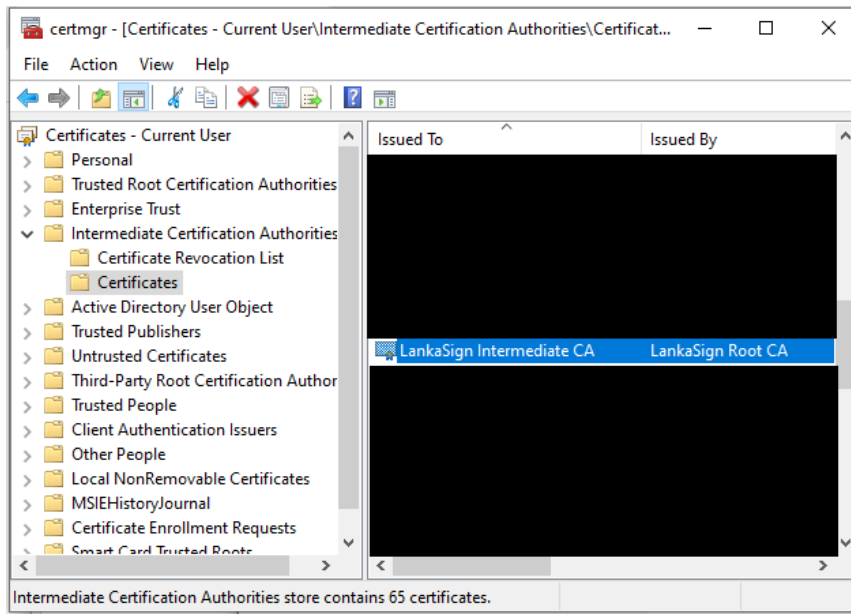

Click on **yes** in popup window

Select the Trusted Root Certification Authorities ➡ Certificates

It will show the installed Root Certificate

Select the Trusted Intermediate Certification Authorities ➡ Certificates

It will show the installed Intermediate Certificate
